

Fayette WSC

Do you want to keep an eye on your water usage?

Would you like to be alerted if you have a potential leak?

Then sign up for:

EyeOnWater[®]

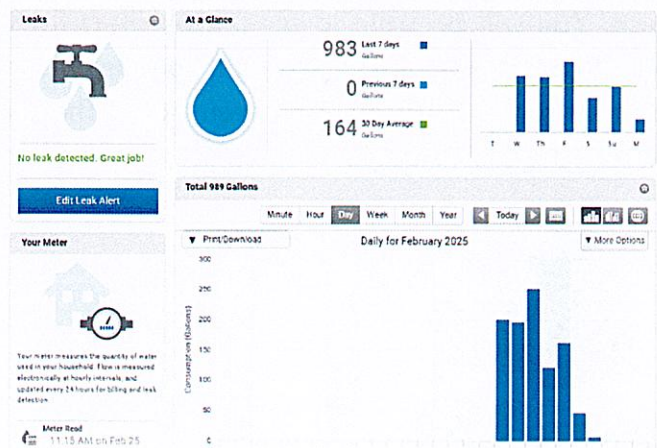

It's available on your phone through the Apple App Store or Google Play.

It's quick and easy to sign up!

If you do not have an iPhone or an Android, you can sign up at <http://eyeonwater.com>

You will need:

- Your FWSC account number
- Your service address zip code

Steps to Create an EyeOnWater Account

Account Number:

Enter your FWSC account number including all leading zeros.

Your account number can be found on your monthly bill.

Some utilities want you to use your account number or customer number as it appears on your water bill. Others want you to leave off leading zeros and non-numeric characters. Other utilities may still be rolling out EyeOnWater®. Please contact your water company directly for assistance.

Service or Billing ZIP/Postal Code:

Enter your 5-digit service address zip code.

Already have an account? Sign in here.

- Next enter your email. Each log in requires a unique email account.
- Then create and confirm your password.

Sample of bill. Your account number is listed in two separate locations on your bill as indicated below.

RETURN SERVICE REQUESTED

KEEP THIS STUB FOR YOUR RECORDS

You will receive a confirmation email from Badger Meter, Inc. Click on the link in the confirmation email and then you can sign in using your email and password.

EyeOnWater will let you set a customized leak rate to alert to usage beyond your normal usage. You will be able to set a leak alert for a continuous leak, as well as, an intermittent leak. A continuous leak is just as it sounds, water is continuously running. An intermittent leak is a leak that runs then stops, runs then stops. The most common intermittent leaks are a toilet or a float on a water trough.

Fayette WSC

If you need help in setting up your new account or leak alert, please contact our office at (979) 968-6475 or email us at info@fayettewsc.com

Welcome to the Eye On Water home page!

Set up Leak Notifications to notify you (via email and/or text) about potential leaks.

Easily view your daily usage graphs, as well as overlays that you can select, such as the daily average temperature

View information regarding your meter, including the last reading time and when the next update will be.

Compare your current usage to the previous week's usage

Any time you see a question mark, click on it to take you to the help section, so that you can learn how to use Eye on Water more efficiently

Export your Hourly, Daily or Monthly Meter Reads into an excel spreadsheet

Leaks

No leak detected. Great job!

[Edit Leak Alert](#)

Your Meter

Your meter measures the quantity of water used in your household. Flow is measured electronically at hourly intervals, and updated every 24 hours for billing and leak detection.

Read Frequency: Hourly

Meter Read: 2:59 AM on Nov 19
200.6300 CCF

Next Update: 2:59 AM on Nov 20

At a Glance

16% decrease

1,546 Last 7 Days gallons

1,840 Previous 7 Days gallons

255 30 Day Average gallons per day

Daily for November 2015

Consumption (Gallons)

Precipitation (in)

Avg. Temp (°F)

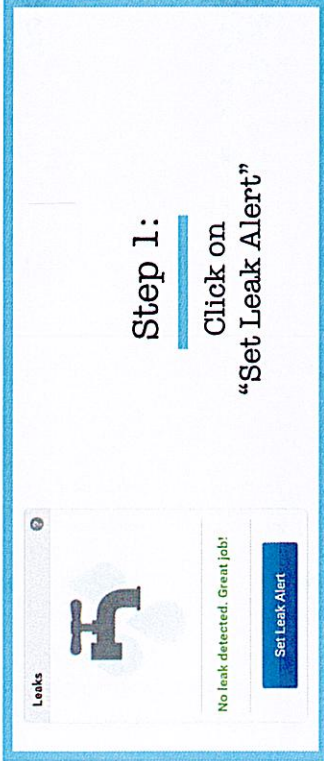

3 1/2 N. Santa Cruz Ave

Remember!

The water we save today can help save tomorrow!

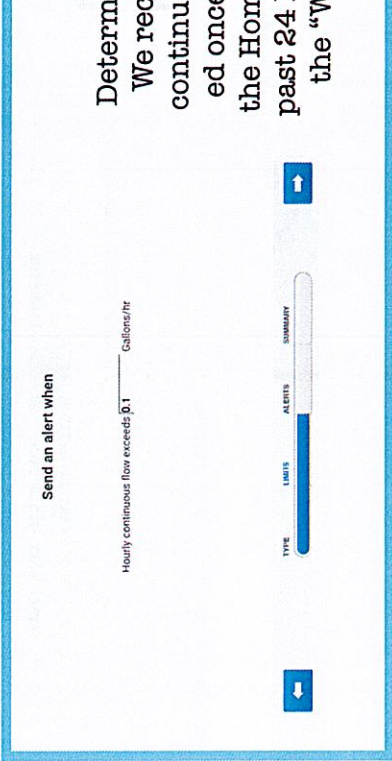

Leak Notifications are a useful way to monitor your system for potential leaks.

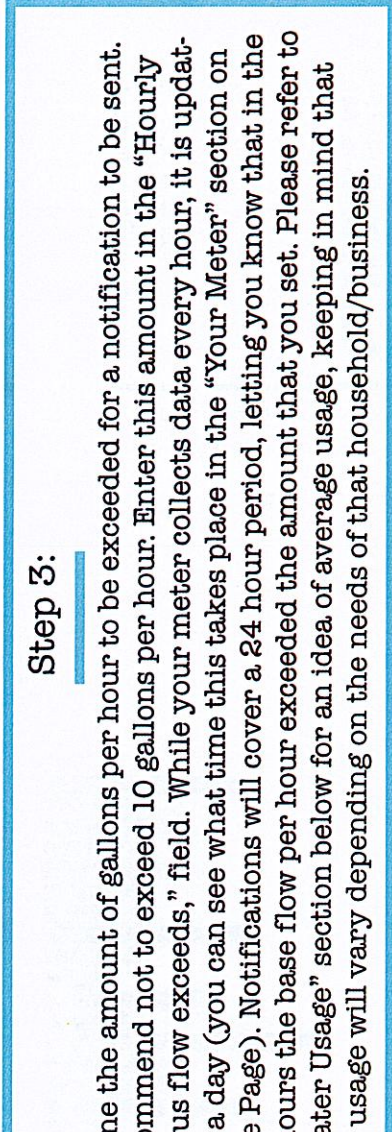

Step 1:
Click on
“Set Leak Alert”

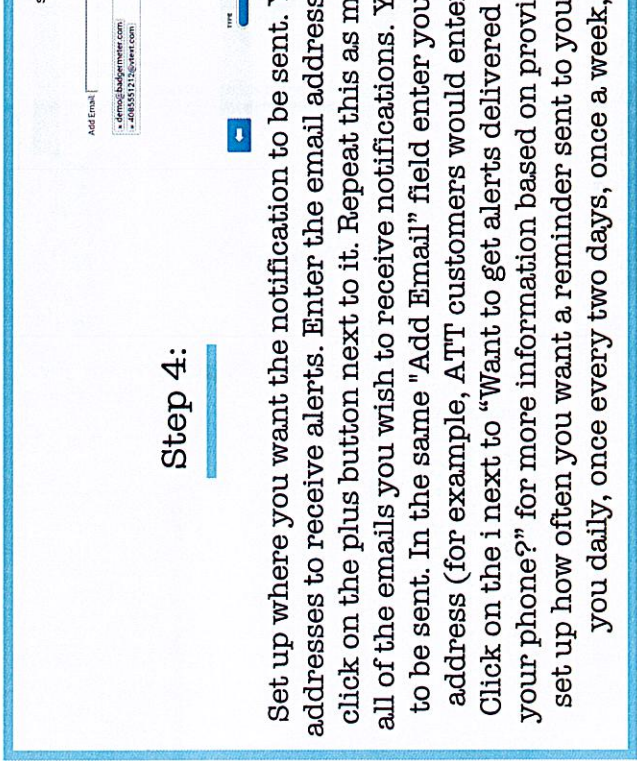

Step 2:
Define the type of flow you expect for this meter. We recommend Intermittent Flow.

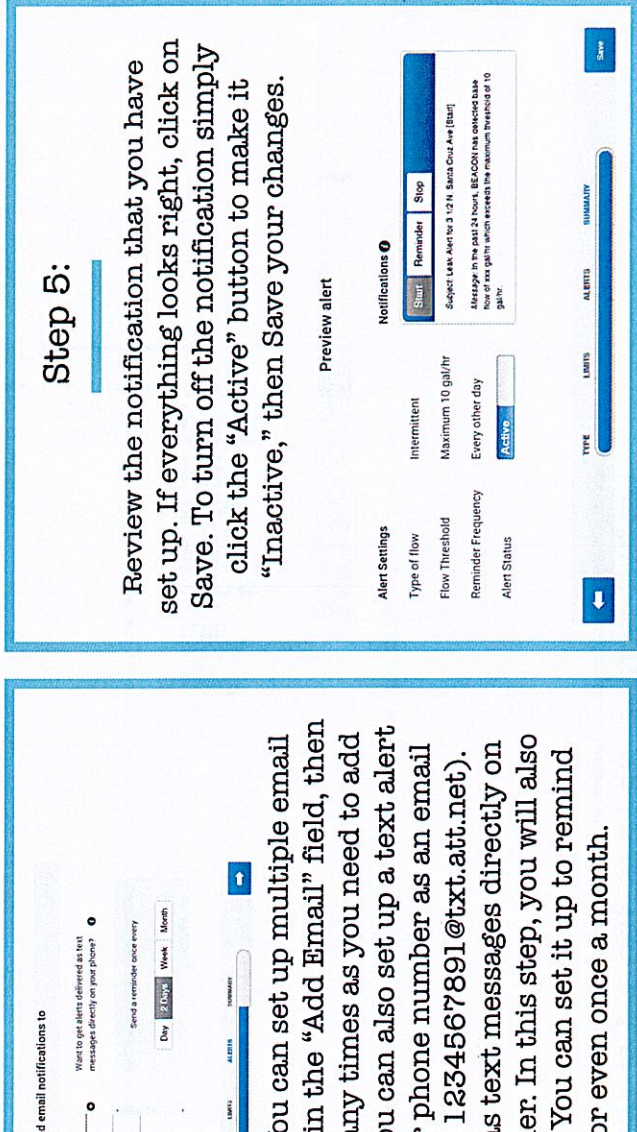

Step 3:
Determine the amount of gallons per hour to be exceeded for a notification to be sent. We recommend not to exceed 10 gallons per hour. Enter this amount in the “Hourly continuous flow exceeds,” field. While your meter collects data every hour, it is updated once a day (you can see what time this takes place in the “Your Meter” section on the Home Page). Notifications will cover a 24 hour period, letting you know that in the past 24 hours the base flow per hour exceeded the amount that you set. Please refer to the “Water Usage” section below for an idea of average usage, keeping in mind that usage will vary depending on the needs of that household/business.

Step 5:
Review the notification that you have set up. If everything looks right, click on Save. To turn off the notification simply click the “Active” button to make it “Inactive,” then Save your changes.

Step 4:
Set up where you want the notification to be sent. You can set up multiple email addresses to receive alerts. Enter the email address in the “Add Email” field, then click on the plus button next to it. Repeat this as many times as you need to add all of the emails you wish to receive notifications. You can also set up a text alert to be sent. In the same “Add Email” field enter your phone number as an email address (for example, ATT customers would enter 1234567891@txt.att.net). Click on the i next to “Want to get alerts delivered as text messages directly on your phone?” for more information based on provider. In this step, you will also set up how often you want a reminder sent to you. You can set it up to remind you daily, once every two days, once a week, or even once a month.

Step 5:
Review the notification that you have set up. If everything looks right, click on Save. To turn off the notification simply click the “Active” button to make it “Inactive,” then Save your changes.

Usage Graphs are a great way to keep an eye on your water usage.

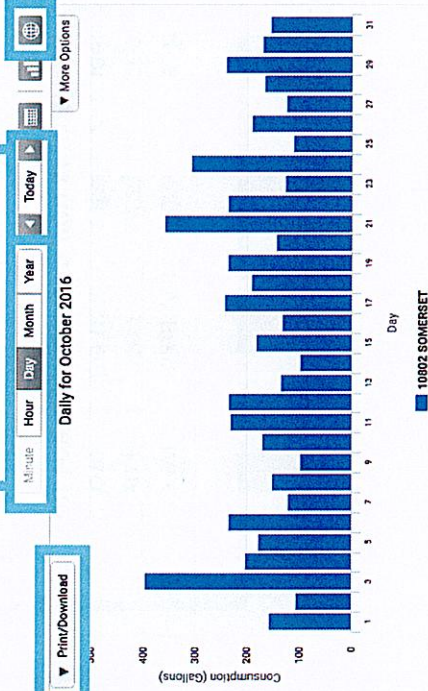

View usage by the minute, hour, day, month, or year.

Easily pull up the date you wish to see the usage data. Scroll through days by using the left and right arrows, or click on the calendar to select the date you want.

-This gives you the option to:

- Print the Chart
- Download the PNG Image
- Download PDF Document

Click on the globe to see a map of the approximate location of your meter.

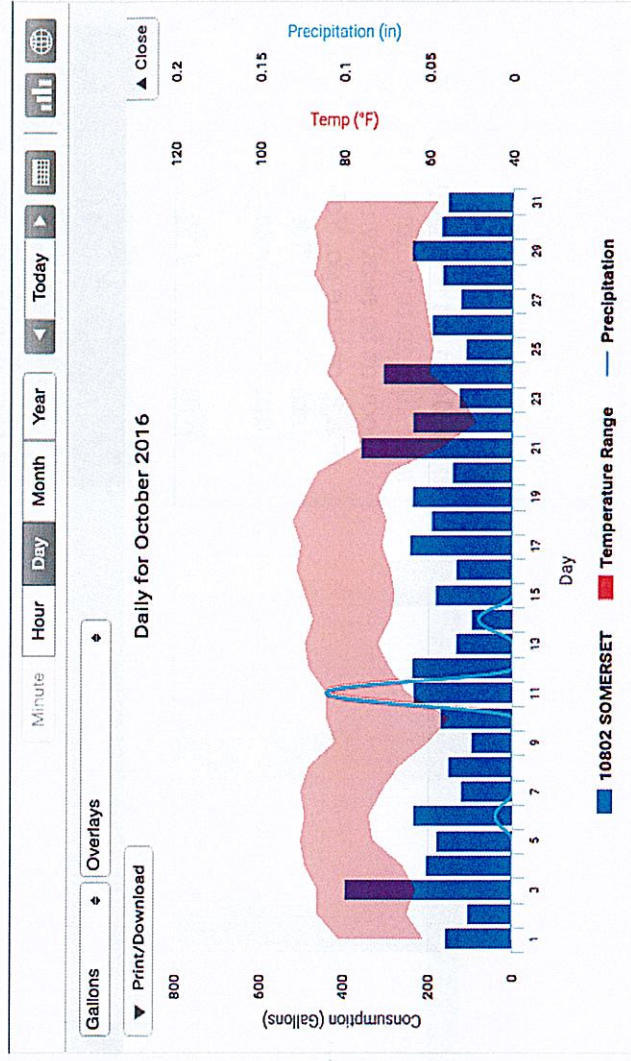

When you select the **More Options** tab on the graph above, you are given more viewing options:

-You can view your usage data by:

- Gallons - this is how your water bill is calculated

-You can also view your usage data in relation to temperature and precipitation overlays. Available overlays are:

- Temperature in Fahrenheit
- Inches of Precipitation

Results File: Click to Download (size 1.3K)

When you export by Daily Meter Reads, it will generate a spreadsheet showing the actual meter reads for the specified time period you designate.

Select Daily Meter Reads. Then enter the start date and end date.

Select "Start Data Export" to run the report.

Export Data

Choose what dates you'd like to view. It will then generate an Excel spreadsheet that provides the usage in gallons based on the aggregation you select.

Select how you would like to receive the date: by hour, by day, or by month.

EyeOnWater has an app that is available for Android and Apple users.

Download it from your app store and sign in to your EyeOnWater account to easily access your usage on the go. You can even register for the first time on the app if you haven't already
